

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country journey in their RV. Recently retired, after spending numerous years working with his brother to assemble their crane company into an industry leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road expedition.

Whilst on their journey, John spent time talking to past business associates whom the Groves stopped to see along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John discovered a vast marketplace for a product that could quickly and safely lift individuals in the air to accomplish maintenance and other construction services.

Following their return from vacation, John set up a business with two of his friends and obtained a metal fabrication business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty employees, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the basic design essentials of that original lift into existing models.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fatefull cross-country journey and since the first JLG aerial platform entered the market. As of today, the company has expanded itself into a number of global marketplaces and continues to cultivate new machinery to guarantee that consumers are able to become safer and more resourceful within their workplace.
